

BULLET SUPERSTAR

ENFIELD

In the 1950's, a rare breed of two-wheeler was born: Bullet.
With its time-tested ruggedness and reliability, it has become a legend. A legend thousands are proud to own. And thousands more longing to own.

DESIGNED BY BRITISH ENGINEERS

Bullet – the reliable one

Bullet is built tough.

Its sturdy frame and the specially designed suspension system make sure you ride a bike of exceptional reliability and strength.

Whether you go on long distance trips or ride through stop-and-go city traffic.

Bullet is designed and built to endure. And takes punishing use day after day, year after year.

Bullet – easy to ride and handle

Bullet is exceptionally stable.

So stable that even if you hit a pothole on the road while riding at 80 kmph or even more, you can count on Bullet to keep its balance. Reason why Bullet is the only bike acrobats use – with full confidence.

On the other hand, Bullet is the only bike that lets you ride at a sedate 25 kmph on top gear. Without stalling, without changing gears.

Moreover, in spite of its heavy-weight appearance, you don't need brute strength to ride and handle Bullet. With its specially designed stand with a fulcrum lever, you can get your Bullet on or off the stand with surprising ease. In fact, you need much less effort handling the Bullet than handling the lightest moped.

Ask a Bullet owner. Or, even better, try it yourself.

Bullet – the powerful one

Even before you see a Bullet, you hear it: the unmistakable beat of the engine.

This powerful four-stroke engine has proved its stamina and consistent performance. Whether you accelerate fast, cruise at high speeds or inch your way through a dirt road, you can depend on the engine.

Bullet – easy to maintain

The design of the entire bike is simplicity itself. So, you can maintain your Bullet in peak condition wherever you are: city, town or village.

And when you want to replace the tyres, it can be done in a matter of minutes. The quickly detachable arrangement for the rear wheel makes sure your Bullet gets back on the road fast.

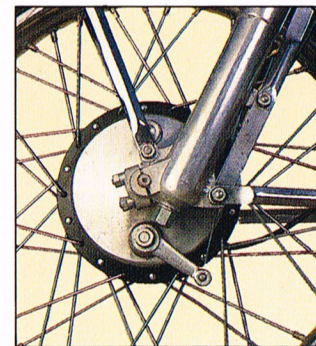

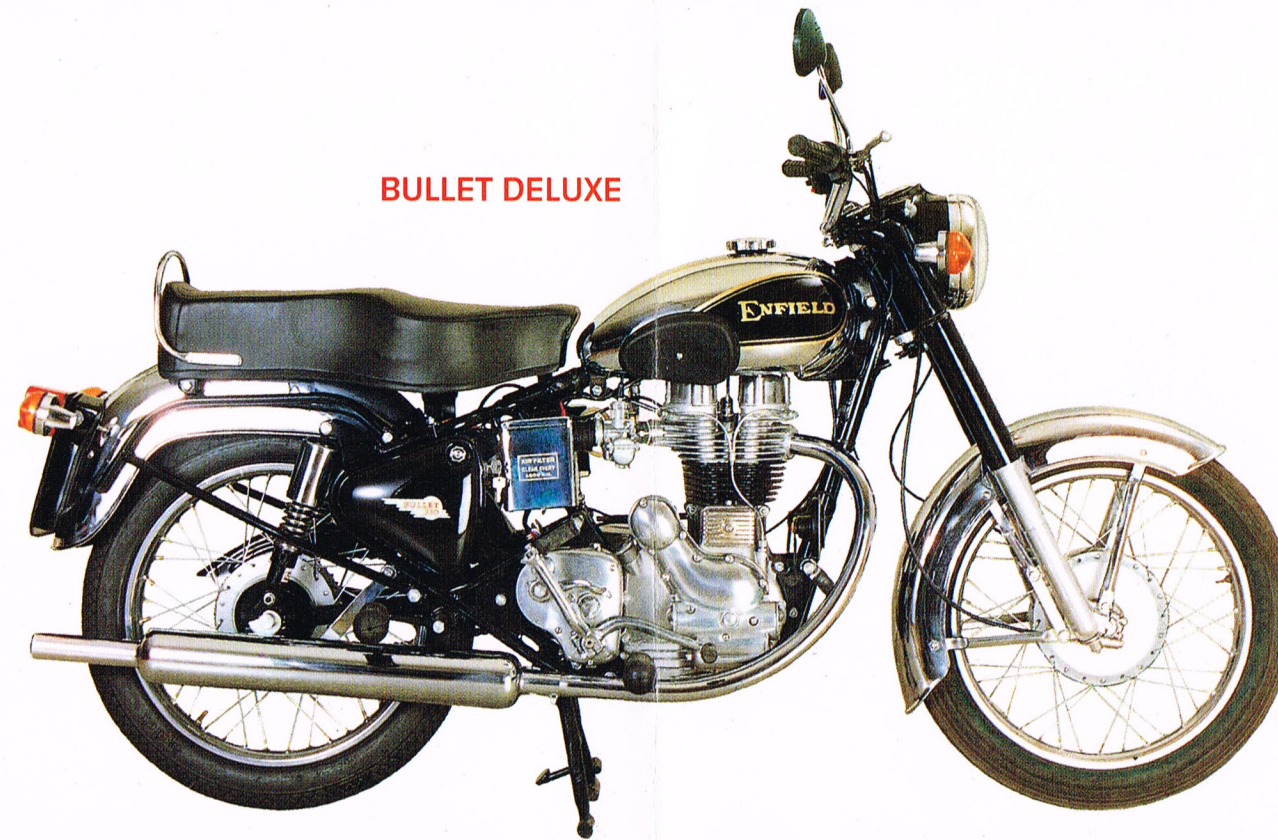

Any way you look at it, Bullet is the bike that's just right for you.

Unlike the spate of new bikes that may be here today and gone tomorrow, Bullet is forever. A fact proved time and again since 50's.

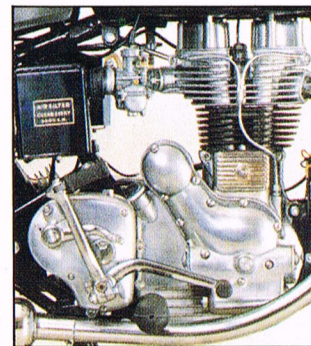

Call on your Bullet dealer today.

You'll settle for nothing less.

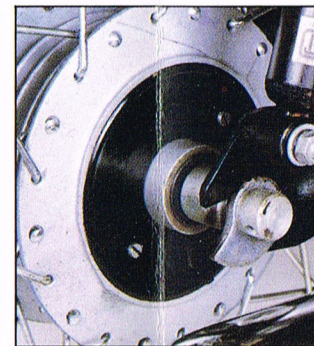

BULLET DELUXE

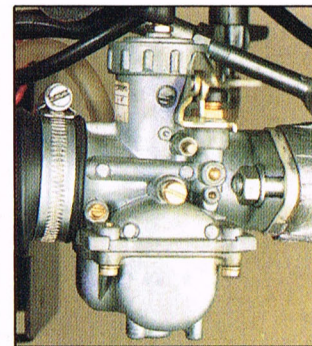

Large brake drum for surer stops.

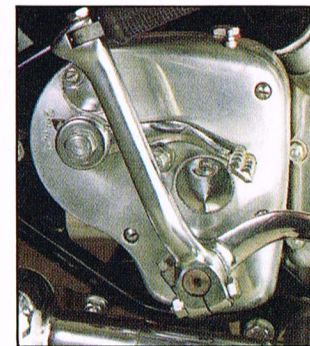

Economical four-stroke engine with excellent pick-up and sustained stamina.

Changing tyres on the Bullet takes just minutes – the quickly detachable rear wheel assembly makes sure!

Improved carburettor for high fuel efficiency.

Foot-operated neutral lever. At whatever gear your Bullet is running, you can bring it back to neutral. All it takes is a gentle press of the lever.

SPECIFICATIONS

Engine	– OHV, 4-stroke, Single Cylinder
Bore & Stroke	– 70 × 90 mm
Displacement	– 346 cc
Compression Ratio	– 7.25 : 1
