AN APPROACH TO PERFECTION

HUSABERG - the world's leading manufacturer of four stroke enduro and cross motorcycles.
Outstanding winner of 8 world champion titles since the start in 1989.
The 1994 models contains even more high performance qualities than ever before.

Some of the news for the -94 models:

Increased output, because of improved air intake. Totally redesigned gearbox to endure really rough handling. Smoother and improved clutch with organic discs.

Improved crankcase ventilation for high revs security. Highly developed frame geometry for "rock-steady" stability. Refined suspension "flattens" almost anything to "easy smoothnes". A new, quick responding short-stroked 501 "champion"-engine. New designed rear end. And finally - new raw graphic design to match this pure fine art of engineering at its peak.

The HUSABERG motorcycles is a product with a combination of reliable technical solutions and high performance quality.

Each motorcycle is carefully build by craftsmen, to secure superb quality and high finish.

HUSABERG
MOTOR AB · SWEDEN

- The swedish enforcer.

THE HUSABERG RIDERS.

Professionals, privateers and "funbikers" are totally agreed: HUSABERG is the most competitive product of them all, standing up to their most critical demands. From the beginning HUSABERG has proven its strength and quality throughout a "giant pile" of national as well as international championships.

THE HUSABERG CREATERS.

The HUSABERG plant is located in a small delightful village called Røfors. Surrounded by natural beauty and industrial history, for example several National Parks and 350- celebrating foundry. Traditions of handicraft were founded in the late part of the 16.th century and are today carried on by the craftsmen at Husaberg. A skill and pride that reasures a product of satisfaction and high value for years to come. HUSABERG creates motorcycles made out of the very best from engineering as well as riding experiences.
